# BioScrub

## Enzymatic Cleaner For Petroleum Stains

Use: Tile & Concrete Floor Cleaning

### What is BioScrub?

A proprietary blend of enzymes and surfactants to help remove petroleum based stains from concrete floors and other masonry floors. This product can be applied before cleaning as a pre-spray or after cleaning to further remove the stains. Does not need to be activated or charged. The enzymes used will continue to break down the stains long after the cleaning is finished. No rinsing is necessary.

### Benefits:

- Breaks down petroleum based stains.
- 100% Environmentally friendly
- Non Hazardous, non toxic.
- Safe to use in public areas.
- Will continue to work long after cleaning is finished.
- Will not leave behind any residue.
- Easy application.
- Available as a concentrate for those with dilution system.

### Directions For Use:

Before using, make sure that the desired surface is cool to prevent early evaporation. Read MSDS and test in a small inconspicuous area. For professional use only by trained personnel.

Apply product manually to desired area.

If using prior to cleaning allow to sit as long as possible before further cleaning. The longer the product sits the better the results. Recommended time is at least 10-15 minutes. Even though the product has dried, the enzymes will continue to work.

If applying after cleaning, clean the area as much as possible, then apply BioScrub. The chemical will continue to work long after the cleaning has been done. Do not rinse after application. Make sure product does not puddle. If so, a slick residue may be left.

### Tech Specs:

Color.....Clear  
 Fragrance.....Faint  
 Form.....Liquid  
 Phosphates.....None  
 FlashPoint.....212F  
 pH.....9.5-10  
 Specific Gravity.....1.03  
 Viscosity.....Moderate  
 Foam.....None  
 Biodegradable.....100%  
 Shelf Life.....1 Year
