

# EcoStrip

## Environmentally Safe Graffiti Remover

### WHAT IS ECO STRIP?

Eco Strip is a heavy duty, non volatile, environmentally safe graffiti remover. This formula will replace many of common solvents making it environmentally safe: low VOC;'s, bio based, readily biodegradable. This product breaks the bonds of paints and coatings Recommended for use on brick, stone, metals, and other masonry surfaces, helping dissolve most spray paints and markings. Soy strip is non-hazardous, making it safe to use and store.

### BENEFITS:

- Is listed on the Design For The Environment approval list.
- Contains no naphtha or chlorinated solvents.
- 100% biodegradable.
- Safe to use in public areas.
- Penetrates and emulsifies paints.
- Won't harm the environment.

### DIRECTIONS FOR USE:

Before using, make sure that the desired surface is cool to prevent early evaporation. Read MSDS and test in a small inconspicuous area.

Prepare surface by scraping off all loose and peeling paint. Apply Soy Strip with a sprayer, brush, or roller. Leave on surface until paint lifts or softens. Most applications will require a setting time of 5 - 20 minutes. When the paint begins to bubble, it is ready to remove. Hot, direct sunlight will cause rapid evaporation of paint removing compound. Rinse and scrape away residue.

The longer the dwell time of the product, the more effective the results. The product is most effective with a dwell time of 10-20 minutes for light problem areas and 20-30 for heavier areas. Re-application and periodic agitation with a stiff bristle brush will improve penetration. Rinse with high pressure water or steam. Reapply if necessary.

Reapplication and periodic agitation with a stiff bristle brush will improve penetration. Rinse with high pressure water or steam. Reapply if necessary
