DustMopH20

Water Based Dust Mop Treatment

Use: Wood & Tile Floor Cleaning

What is DustMop H20?

Dust Mop Treatment is a ready to use, water based dust mop treatment that reduces air borne dust caused by dry mopping. This product is easy to apply and will not leave residue on the floor if dried properly. Unlike other solvent based Dust-mop treatments, this product is low odor and easy to handle.

Benefits:

- Non-Solvent based formula
- Easy to apply
- Coating reduces dust when dry mopping floors.

Directions For Use:

Before using, make sure that the desired surface is cool to prevent early evaporation. Read MSDS and test in a small inconspicuous area.

For Treatment on Clean Mops:

Sprinkle or spray dressing onto mop completely covering fiber. Hang or place in clean container and allow to cure or dry completely. Renew treatment when necessary.

Avoid using too much dressing on mop for besides being wasteful it may make floor slippery.

Treatment may be removed from mop with washing by machine or hand. After cleaning shake out mop to remove loose dirt.

After washing, allow to thoroughly dry before retreating.

Tech Specs:

Color.....Clear
 Fragrance.....Cherry
 Form.....Liquid
 Phosphates.....None
 FlashPoint.....212F
 pH.....7-7.5
 Specific Gravity.....1.00
 Viscosity.....Thin
 Foam.....None
 Biodegradable.....100%
 Shelf Life.....1 Year
