NoBrown

Debrowning Treatment For Carpets

Use: Carpet & Traffic Lane Cleaning

What is No Brown?

This debrowning treatment penetrates and dissolves stubborn stains on all types of fibers including problematic fibers such as wool and acrylan. It also prevents and corrects browning of fibers caused by a build up of alkaline residue. Will also dissolve light rust.

Benefits:

- Prevents and dissolves stubborn stains.
- Safe to use on problematic fibers such as wool and acrylan.
- Corrects browning of fibers caused by alkaline residues.
- Dissolves light rust.

Directions For Use:

Before using, make sure that the desired surface is cool to prevent early evaporation. Read MSDS and test in a small inconspicuous area.

To control browning mix (1) part NO BROWN to four (4) parts water and with a hand sprayer (1-2 gallon capacity) spray the areas on the carpet which have browned. Agitation with a brush may be necessary for the browning to disappear. Avoid over-wetting the carpet; drying time will be longer. Always leave the cleaned or treated areas well ventilated if possible. Do not exceed the recommended pH or 8.0 when cleaning wool and acrylan carpets. Do not use the NO BROWN for prespraying and spotting on wool or acrylan carpets.

Tech Specs:

Color.....Clear
 Fragrance.....Characteristic
 Form.....Liquid
 Phosphates.....None
 FlashPoint.....212F
 pH.....2-3
 Specific Gravity.....1.03
 Viscosity.....Thin
 Foam.....Moderate
 Biodegradable.....100%
 Shelf Life.....1 Year
