EW-3000

Defoaming Powdered Egg Wash

Use: Food Service & Food Prep Areas

What is EW-3000?

A powdered cleaner for use in automatic egg washing machines. Eliminates the waste and performance-control problems typically experienced when using egg wash powders. Contains special defoaming agents to control foam caused from the cleaning process. Regular maintenance of the cleaning solution will drastically improve performance.

Benefits:

- Incredible non foaming formula.
- Highly concentrated for economical dilutions.
- Cleans and removes build up in one shot.
- Versatile enough to clean virtually any non aluminum surface.
- Can be used for boil-outs, soak tanks, and heavy cleaning applications.

Directions For Use

For institutional or commercial use.

Before use, read product label and Material Safety Data Sheet.

Maintain a concentration of 0.5 to 3.0 oz per gallon of water in wash tank as necessary to maintain a minimum pH of 10.5. The use dilution required depends on the degree of soil and amount of egg breakage in the machine. Maintain wash water at a temperature that is at least 20°F higher than the egg itself, but not less than of 90°F. Do not use wash water containing greater than 2 ppm of iron. Follow washing with an approved sanitizing rinse. The temperature of the sanitizing rinse should be equal to or higher than that of the wash solution. Pack eggs only after they are completely dry.

For Use In USDA Facilities.
Meets USDA Guidelines
For Manufacturing & Cleaning.

Tech Specs:

Color.....White
Fragrance.....Faint
Form.....Powder
Phosphates.....None
FlashPoint.....212F
pH.....NA
Specific Gravity.....NA
Viscosity.....Free Flowing
Foam.....None
Biodegradable.....100%
Shelf Life.....1 Year
