Roof & House Wash

Environmentally Safe Roof & Siding Cleaner

What is the eco wash System?

The eco wash is a revolutionary new cleaning process that uses new patented foaming technology to improve the cleaning process as well as decrease the levels of chemical required to do the same job. Each of these products have the foam building system built into them allowing for a much longer dwell time and improved effectiveness. Surfaces stay wet longer allowing the chemicals to do more work with less product. Every ingredient formulated into these products is designed to be environmentally and user safe.

What is House & Roof Wash?

House & Roof Wash is a revolutionary new product formulated for the house and roof washing professional. This incredible product is added to a hypochlorite solution to prolong its effect while allowing concentrations of bleach to be cut in half. Ecowash can also be used alone without bleach to clean surfaces to remove dirt, debris, and other environmental stains. There is a patented deodorizer package built into the product that will help mask the scent of traditional bleach and non bleach solutions.

Product Benefits:

- Highly foam levels.
- Keeps bleach wet longer allowing it to be more effective.
- Allows for use of more diluted bleach solutions.
- Many times bleach solutions can be cut in half.
- Great for use on houses and roofs.
- Contains citrus oils that help mask bleach odors.
- Foam quickly carries away dirt and debris from surfaces.
- Environmentally Safe & Biodegradable.

Directions For Use:

Structure Washing:

Mix 6 - 8 oz to 5 gals of 12% Sodium Hypochlorite. Ratio onto surface approx. 7:1.

Roof Washing:

Mix ½ gallon to a 55 gal drum of 4% Sodium Hypochlorite, Mix 3 qts to a 30 gal drum of 4% Sodium Hypochlorite, Mix 4 - 6 oz to a 5 gal pail of 4% Sodium Hypochlorite. If using a 6% solution or 12% solution of bleach, use the same mix ratios as stated above.

NOTE: Before using any solution that contains bleach (Sodium Hypochlorite) make sure all applicators, tanks, and storage containers are approved for use with bleach and contain the appropriate venting devices. If you are unsure if any device being used is appropriate for use with bleach, DO NOT USE IT until you contacted the supplier of the machinery and containers. Misuse and incorrect storage is considered dangerous and detrimental to health and safety of the user.

Once product is mixed, apply to desired surfaces. Foaming will allow solution to work longer and more effectively on the surfaces, requiring less labor and less cleaning solution. Rinse with the least amount of pressure possible needed to get the surface clean. Warm water can allow for better performance and expedited rinsing. Use caution when using heat on various substrates.

Tech Specs:

Color.....Yellow
 Fragrance.....Lemon
 Form.....Liquid
 Phosphates.....None
 Flash Point.....212°F
 pH.....7-8
 Specific Gravity.....1.03
 Viscosity.....Thin
 Foam.....High
 Biodegradable.....100%
 Shelf Life (in original sealed containers).....1 Year

Available Packages	
6431-275	275 Gallon Tote
6431-55	55 Gallon Plastic Drum
6431-30	30 Gallon Plastic Drum
6431-15	15 Gallon Plastic Drum
6431-5	5 Gallon Plastic Pail
6431-5.25	2 x 2.5 Gallon Jugs
6431-4	4 Gallon Case
6431-QT	12 x 32oz Quart Case
